

Akuvox Set up & How to Guide

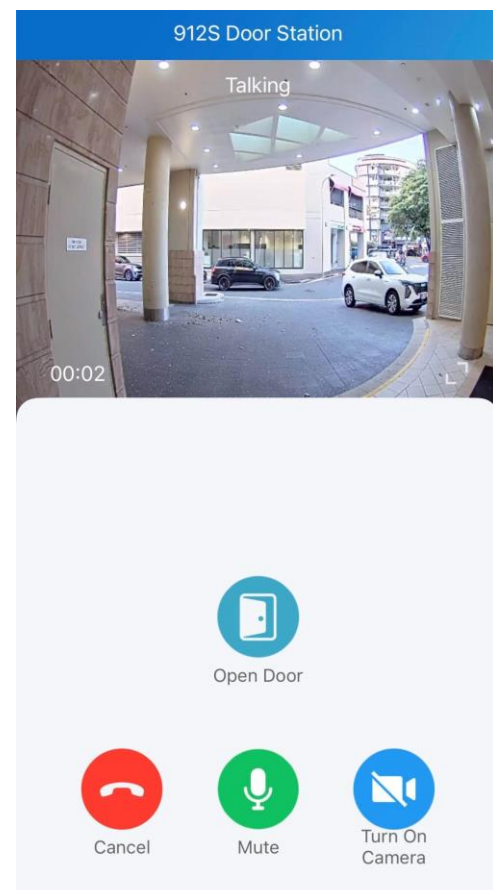

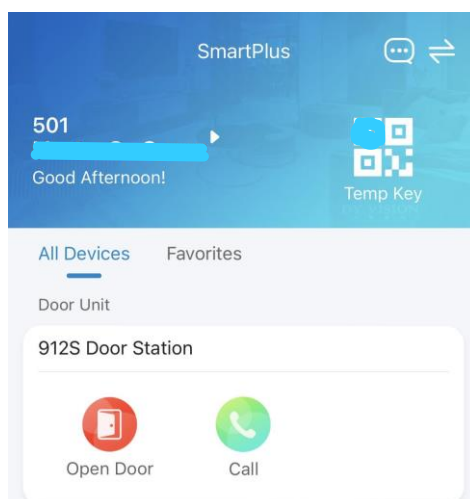

How to add system to smartphone

1. Open email from 'Akuvox'
2. Follow steps on email to download 'SmartPlus'.
For Android - Google Play
For IOS - AppStore
3. Open SmartPlus app once downloaded
Agree to all terms and conditions
4. Allow all pop up permissions including Bluetooth, camera and notification access
5. Enter user name (the email address beside 'User Name' on the Akuvox email)
6. Enter password (the password on the Akuvox email)
7. When asked to enter door code, press skip on bottom of screen
8. Now the Intercom Door station should be displayed on the app

How to use Intercom

- To call intercom from phone, press 'Call' button on app
- To open door and unlock lift to your level, press 'Open Door' button on app
- When visitors are calling you from the intercom, the intercom will ring your phone like a normal phone call, this will display the live view of the intercom showing your visitor
- You can then accept or decline the call and open the door from that phone call.
- Visitors at the intercom will press your apartment number, then bell, this will now call you.

How to give other members in the same apartment intercom access

1. Open 'SmartPlus' app
2. On the bottom right of the screen press 'Me'
3. Press 'Family Members'
4. Press '+ New Family Members'
5. Enter in the first and last name of the person you are wanting to grant access
6. Enter their email address and phone number
7. Press submit
8. This has now generated them their own 'Akuvox' email
9. Follow the above steps to repeat set up for them
