

# The **ONLY** thing you should **FLUSH**

Flushing the wrong thing down your toilet causes blockages that may flood your apartment, and the apartment below!

**This can leave you with a very expensive repair bill – as much as \$10,000!**

## Prevention - What you can do:

- Only flush the three P's – pee, poo and paper.
- Use a bin in your bathroom for everything else.
- **NO "FLUSHABLE WIPES"**  
Don't fall victim to misleading labels on wet wipe packaging – even though they may say they're 'flushable', they don't break down like toilet paper, and cause blockages.
- Promptly report to management any "slow" draining showers, water rising from your floor drains, or any other plumbing issues.
